# Arm your production with unwavering precision

## High-quality forming is mission-critical in the defense sector.

In defense production, there's no margin for error. Count on Hydraulic equipment to deliver the precision and reliability required to keep critical operations on track.

Our custom-built hydraulic presses—up to 10,000 tons—are engineered to handle even the most demanding military applications.

## Why choose Hydraulic for defense manufacturing?

### 01 Tailored configurations for every mission

Unlike off-the-shelf presses, our systems are custom-engineered to fit your facility layout, part geometry, and production demands—while ensuring future adaptability. Whether you need a turnkey solution or a more customized setup, our presses are designed for rapid ROI, ease of use, and seamless documentation of process know-how for your team.

### 02 High capacity with unwavering consistency

Servo-hydraulic systems, along with optimized lubricating and heating solutions, enable high-volume output without compromising quality, maintaining strict process control through every cycle. Advanced monitoring reduces scrap and rework, ensuring each component meets stringent requirements for consistent, reliable performance under demanding conditions.

### 03 Superior uptime and reliability

Engineered for continuous operation under extreme conditions, Hydraulic presses minimize downtime and maximize productivity. With automated handling, lights-out capabilities, and integrated controls, our solutions streamline workflows, reduce labor demands, and help you meet time-critical defense schedules with confidence.

Among our many proven solutions is the ability to pierce and cabbage the billet within a single press.

### Maximize readiness and performance

From rocket fins and grenade casings to ballistic panels and long-range ammunition shells, Hydraulic's expertise extends to even the most complex defense applications. Our proven technology empowers you to produce top-tier defense components at scale—where others fall short.

**Contact us to learn how Hydraulic can fortify your manufacturing operations with presses designed to meet—and exceed—the highest defense standards.**
